

Commercial grade
Planters

About us

EXPERTISE & DURABILITY

All our planters are **commercial grade**, built to give many years of service, and suitable for harsh climates and high foot traffic areas.

Typical applications are rooftop terraces, restaurants, hotels, shopping malls, and any space, such as patios and verandas, that require bespoke solutions.

Custom Planters - Edges

Made from aluminum, corten steel, stainless steel, or even fiberglass, custom planters and edges are perfect for commercial applications, high pedestrian traffic areas, private verandas, terraces, and interior spaces where design, durability, and custom dimensions are required.

STYLES & VARIANTS

Unlock endless possibilities with our customizable planters. Whether you envision classic designs, open-bottom planters for seamless integration with the ground, or modular edges to create expansive configurations, we can bring your ideas to life.

APPLICATION

Suitable for both indoor and outdoor spaces and can have many practical and aesthetic applications.

MATERIALS

- Commercial grade aluminum
- Corten steel (weathering steel)
- Stainless steel
- Galvanized steel
- Fiberglass & Concrete (large quantities)

COLORS & FINISHES

Large number of colors and textures available

DESIGN

Our planters are designed with flexibility and functionality in mind. We offer a wide range of options to suit your needs, including: Casters, drainage panels, insulation, integrated LED lighting,...

Custom Planters - Edges

Metal Planters

Choose from cube, rectangular, and cylindrical models, each offering a unique touch to your outdoor decor. Cube planters are ideal for creating focal points, while rectangular models allow you to structure your plantings linearly, perfect for hedges or borders. Cylinder planters, on the other hand, add softness with their rounded shape, ideal for varied floral arrangements. Our planters are available in various sizes to meet your specific space and style needs.

Fiberglass Planters

The fiberglass collection consists of light and sturdy minimalist planters. The geometric shapes allow the planters to be mixed and matched as desired to fit effortlessly into most modern conservatory or garden designs. A wonderfully intense and versatile material, fiberglass is maintenance-free and lightweight. Completely frost-free and noncorrosive, it is superior to terracotta, stone, and even some metals and is ideal for indoor and outdoor use. The finishes are so authentic and durable that even their owners have forgotten they are fiberglass.

**STRENGTH, DURABILITY
& RESISTANCE**

Concrete Planters

Indoors or outdoors, **concrete planters** offer a simple and durable design with different styles, sizes, and colors to fit your needs.

No matter what your landscaping project demands, we have the products to meet your needs. We only use top-quality materials and employ strict quality control measures throughout manufacturing to ensure a quality product is produced on time.

Like all our products, our parts are extremely strong and designed to withstand four seasons and even the most extreme climates.

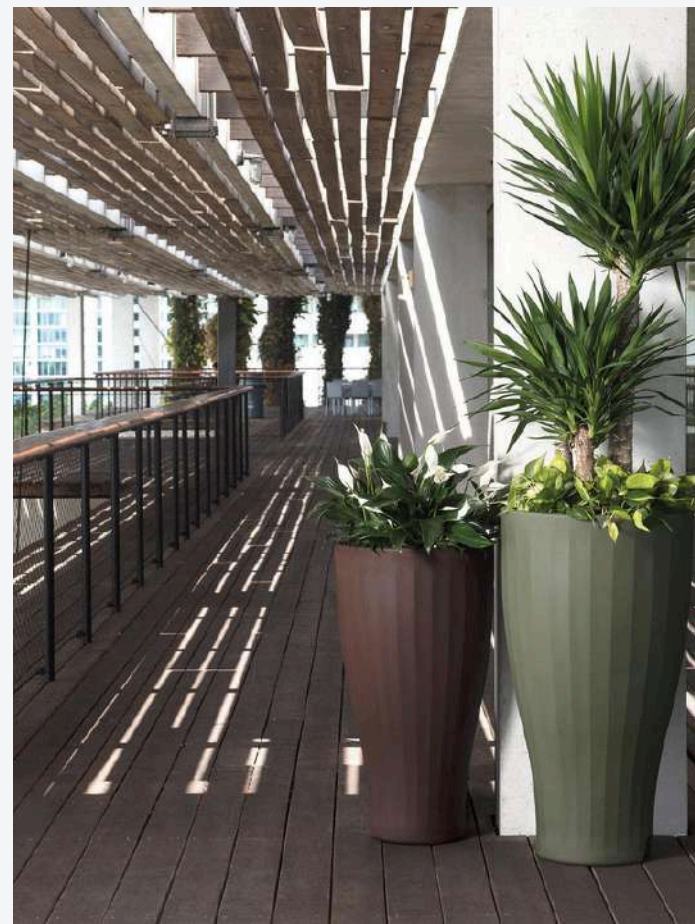

Resin Planters

Our resin planters are crafted from durable, lightweight polyethylene, ensuring long-lasting performance with minimal maintenance. Designed for year-round outdoor use, they withstand even the harshest winter climates. The double-walled construction provides superior insulation, keeping the soil cool and protecting roots from prolonged, intense sunlight and extreme temperature drops.

Unleash your creativity with our extensive range of shapes, sizes, and colors, perfect for bringing your vision to life.

STURDY &
LIGHTWEIGHT

Site Furnishings

Transform outdoor spaces into welcoming, functional, and visually stunning environments with our innovative urban furniture collection. Crafted from concrete and other durable materials, our designs blend style, strength, and practicality seamlessly. Perfect for parks, patios, sports complexes, and gardens, our solutions elevate aesthetics and usability in any setting.

"With the custom made planters from Urban Pot we were able to make the vision of our clients become reality. We are impressed with the material choice, design, and price and will definitely use Urban Pot for upcoming projects and we highly recommend the product and service."

Andres Principal, Miami, FL

"We purchased Urban Pot planters for the patio of our condo project. The planters are strong and durable, and really add to the look of the landscaping. The materials used are of high quality and have successfully withstood the weather. Also, the customer service has been exceptional, responding quickly to all my questions and concerns."

Julie, Construction Manager, Montréal, QC
